

RESEARCH VOLUNTEERS NEEDED

Volunteers ≥ 75 years of age are needed to participate in a study examining the relationship between the brain and mobility.

Volunteers will receive a free physical exam and free comprehensive assessments of balance, mobility, blood pressure and brain function, including an MRI. Assessments will require 4 visits (2 hours each) and will be repeated at 2- and 4-year intervals.

To qualify for a screening, participants must be free of conditions known to impair mobility and function (example, Parkinson's disease, stroke).

**If you are interested, please call
(860) 679-4228.**

More detailed information can be provided to you and a phone screen can determine if you may qualify.

There is no cost to participate.
Transportation costs will be covered by the study.
