

**Site of second 3-T MRI scanner** - the bay for the second scanner is currently under construction.

**Whitehall Building** - 14,000 square feet, main site of Olin Neuropsychiatry Research Center, containing 3T scanner #1, electrophysiology lab and space for clinical assessment, faculty, postdoctoral fellows, image analyst and research assistants.

**Huntington Building** - currently unoccupied: to be demolished 2011 and replaced by a new two-storey building for research assistants and fellows with 6,500 sq. ft. additional space for high-end servers and storage of clinical specimens.

**Butler Building** - 30-sec walk from the Olin center. The First-floor (~18,000 square feet) consists of space for research assistant offices, clinical interviewing space, psychopharmacologic dosing.

**IOL campus** - 35-acre campus landscaped by Frederick Law Olmsted is a two-minute walk from the Olin center. The Institute of Living's gracious campus is located just south of downtown Hartford and the state capital, and just a few blocks east of Trinity College. The Institute's campus is part of a larger medical complex that also includes Hartford Hospital and the Connecticut Children's Medical Center (CCMC).
